

'Thank you' to all of the ostomates who helped in the development of Trio Diamonds™.

You said....

'It kills every odour going, no matter what!'

'The odour control was brilliant!'

'More confidence of room freshness.'

'Had no need for (additional) odour control.'

'Very good for odour control. Much better than my spray.'

'Much better than any used before.'

'Had no 'ballooning' with TR 105.'

'There was no 'ballooning' at all'

'I didn't have to use the bathroom early morning to release the gas.'

'Can't praise it enough. Send me more now!'

'I think this product is great!'

Everyday use
for ostomates
as required

Super-absorbent Gelling Sachets

- ✓ Reduces and often eliminates odour
- ✓ Reduces 'ballooning'
- ✓ Improves comfort
- ✓ Reduces leakage
- ✓ Flatter, more discreet pouch
- ✓ Less emptying
- ✓ Reduces pouch noise

Transform your pouch... ...with Diamonds™

Comfort and confidence

Our super-absorbent Diamonds™ give you all the benefits of a normal gelling sachet:

- ✓ greater comfort
- ✓ reduced leakage
- ✓ flatter, more discreet pouch
- ✓ less emptying
- ✓ reduced pouch noise

plus the new advantages of our **ActiveOne™ Odour Control and anti-‘ballooning’ technology**

Following independent laboratory testing and ostomate evaluations, Diamonds™ is proven to reduce and often completely eliminate unwanted odours – increasing confidence and freshness, especially during pouch emptying and changes.

THE THEORY IS SIMPLE...THE TECHNOLOGY IS ADVANCED
...the result is for you

In each sachet the **ActiveOne™** Odour Control has a surface area bigger than a tennis court. Unwanted odours are locked inside the **ActiveOne™** Odour Control system. The contents are then flushed away as usual, with total discretion.

Excess gas is also reduced and sealed inside the **ActiveOne™** Odour Control system, often eliminating or reducing the problems associated with pouch ‘ballooning’.

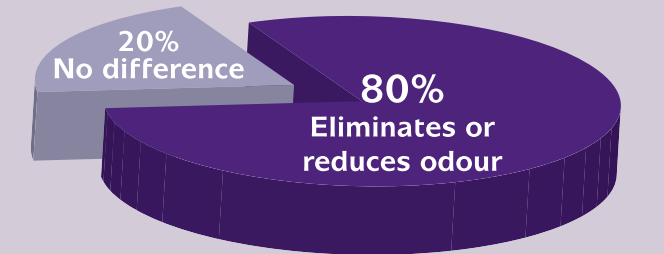

Quick, clean and easy-to-use

1. Place one complete sachet into your pouch.
Do not open the sachet.
 2. Empty and dispose of pouch contents as normal.
Additional sachets can be added through the pouch outlet after emptying. Do not eat the sachet.
- Your output may appear darker than usual and/or may contain black flecks. This is a visible indication of the **ActiveOne™** Odour Control system.

ActiveOne™ Odour Control and anti-‘ballooning’ technology

After detailed development, we asked 35 ostomates to evaluate Diamonds™. Here are some of the results:

Eliminates odour 37% Reduces odour 43% No difference 20%

- 3/5 said Diamonds™ reduced or eliminated their ‘ballooning’ (excess gas)
- Almost 9 out of 10 said they will continue to use Diamonds™

Independent Laboratory Test using the major¹ faecal odour
